PROFESSIONAL SUMMARY

Software Developer with experience building PySpark and SQL data transformations, database-backed APIs, and enterprise data pipelines. Work includes database development, API integration, debugging, and data-quality testing. Delivered data workflows using Azure Data Factory, Databricks, Kafka, and Snowflake; worked on schema design, stored procedures, query tuning, and data-quality incident investigation. Built AI automation projects using OpenAI APIs and n8n for news summarization and voice-based assistance, including scheduled execution, API data mapping, and request routing.

TECHNICAL SKILLS

- Languages: Python, SQL.
- Backend: Flask, REST APIs, JSON, API integration
- Databases: SQL Server, PostgreSQL, Schema design, query tuning
- Data and cloud: PySpark, Azure Data Factory, Azure Databricks, Azure Synapse, Azure Application Insights.
- AI & Automation: n8n, OpenAI API, Prompt Engineering, NLP.
- Tools: Git, GitHub, Docker, Linux, Postman, Jira.
- Practices: Agile/Scrum, SDLC, Debugging, Unit Testing

PROFESSIONAL EXPERIENCE

Software Developer

Rs Technologies Inc | Novi, MI | Jan 2026 – present

- Built REST APIs for an enterprise HRMS to create, update, list, and search employee profiles, connecting employee-management screens to backend data operations.
- Designed SQL Server schemas and the persistence layer for employee records and reporting-manager hierarchies; supported file-upload and employee-data workflows.
- Implemented role-based access for Admin, HR, and Employee users and added audit logging to track user activity for compliance requirements.
- Contributed to Azure Data Factory and Databricks pipelines feeding Synapse and downstream SSRS and Power BI reporting.
- Investigated API response times and failures using Azure Application Insights; tested API behavior with Postman and contributed to code reviews and phased releases.

Software Developer Intern

Tech Talent Connect LLC | Remote, USA | Apr 2025 – Jan 2026

- Developed and maintained Python-based backend services using Flask, delivering REST APIs for core application features and third-party integrations.
- Implemented and optimized SQL queries and schema updates in MySQL and PostgreSQL to improve data consistency and system reliability.
- Diagnosed and resolved production defects by analyzing logs and debugging backend services, reducing recurring issues and improving stability.
- Collaborated in Agile sprints to estimate tasks, deliver features on time, and document APIs and deployment workflows.

Software Developer Intern

AirFi.in | Hyderabad, India | Jan 2021 – Jun 2023

- Built and enhanced responsive web application features using JavaScript, HTML, and CSS, ensuring cross-device compatibility.
- Developed backend API endpoints in Python and integrated frontend components with server-side logic.
- Automated internal data processing workflows using Python scripts, reducing manual data cleanup efforts.

- Designed and maintained relational database schemas and SQL queries to support reporting and application features.
- Provided production support by debugging issues, analyzing logs, and deploying fixes to minimize downtime.

TECHNICAL PROJECTS

Project: Multimodal AI Assistant for Telegram - Built a production-ready AI assistant using n8n workflows, integrating OpenAI (GPT-4, Whisper) and Perplexity APIs for transcription, intent routing, summarization, and real-time information retrieval.

Project: Automated Daily News Intelligence Agent (Discord) - Developed an automated Discord agent delivering AI-summarized daily news using scheduled retrieval, GPT-4 summarization, and API-based integrations.

Project: Context-Aware AI Chatbot Workflow - Designed an end-to-end AI chatbot with context-aware, research-backed responses, supporting file uploads and modular feature expansion using n8n and OpenAI APIs

EDUCATION

Master of Science in Information Technology Sept 2023 – Dec 2024

University of Wisconsin-Milwaukee: (Relevant Coursework: Machine Learning for Business, Artificial Intelligence, Business Intelligence, Web Mining, Big Data in Business).
